* **Flex Time Classes** are 90 Minute slots reserved for student requests for training in older systems and software that is not scheduled in our typical monthly training classes. To Schedule, contact one of our stores for more information. Published: **3/24/17**

- ✓ PCs training uses Windows 10 or later and Macs are taught using macOS Sierra or later.
- ✓ iPad, iPad Mini and iPhone class instruction is conducted using the iOS 10.x.x or later.
- ✓ **All training topics are available in Flex Time and for One-On-One sessions.**

Which is best for you?

A class with other students or a One-On-One training session with the Mac or Windows software instructor?

Many people purchase a class or One-On-One training for their friends and relatives who received a new Windows 10 computer, Apple MacBook, iMac or iPad during the holidays. They usually say the training is to help their friend understand their new device quicker and therefore enjoy their new "toy" more.

One-On-One training is perfect for many people because it is very focused on the specific needs of the student.

Ask Dick Smith, Training Director, to discuss which training would be most beneficial to your personal or company situation. All classes in the Class Descriptions document are available for One-On-One training.

Purchase the Super Savers Training Card to have access to all our training classes for an entire year. Just \$99! Take all the Windows and Apple classes you want. Purchase online at www.mycomputerconcepts.com | computer training or at one of our three store locations. You'll receive a coupon code to start signing up for classes right away. A Great Gift for any time of the year.

Sign up for a class today at one of Computer Concepts' three locations!
