WINDOWS COUNTDOWN

Microsoft released Windows 11 on October 5, 2021.

Microsoft will End Support of Windows 10 on October 14, 2025.

For current Windows 10 users, there are minimum system requirements for installing Windows 11 on a Windows 10 computer. If your computer and other necessary equipment can't meet minimum Windows 11 requirements, you will not be able to install Windows 11.

If this happens, consider purchasing a slightly used or new Windows 11 computer.

If you are unsure whether your PC meets these new requirements, visit our Williamsburg or Yorktown store to talk with one of our computer Technicians. Call Computer Concepts in Yorktown [\(757\) 873-1580](tel:7578731580) or Williamsburg [\(757\) 564-3996](tel:7575643996).

APPLE COUNTDOWN

Some Apple Devices Will Be Losing Support in October 2025. *What You Need to Know!*

Apple prioritizes optimizing its software for newer hardware. As devices age, their processors and hardware struggle to keep up with the demands of the latest operating systems. Phasing out support ensures Apple can deliver better performance and new features to its current lineup while maintaining a high standard of user experience.

Which Apple Devices Will Lose Support in 2025?

iPhone:

- iPhone XR (Released in 2018)
- iPhone XS and XS Max (Released in 2018)

iPad:

- iPad (7th Generation) (Released in 2019)
- iPad Pro (1st and 2nd Generation) (Released in 2015–2017)

Mac:

- MacBook Pro (2018 models)
- Mac Mini (2018 models)
- iMac Pro (Released in 2017)

Apple typically ends macOS support for devices over seven years old. This means the listed models will likely stop receiving major macOS updates.

What Does This Mean To You?

If you own one of these devices, you will miss out on the new features introduced in iOS 19, iPadOS 19, or macOS 16. *What this means is your device will face heightened security risks as it will be more susceptible to malware and cyberattacks.* You may also encounter app compatibility issues. Developers rarely update their app API, (Application Programming Interface), to support older operating systems - this could result in crashes or reduced functionality.

What Are Your Options?

If your device is not going to be supported in the future, here's what you can do:

You Can Upgrade to a newer iPhone, iPad or Mac!

If you need help, call Computer Concepts in Yorktown [\(757\) 873-1580](tel:7578731580) or Williamsburg [\(757\) 564-3996](tel:7575643996) to speak to one of our computer technicians. You'll be glad you did.

On the 4th of July, 2025, Americans will have celebrated American INDEPENDENCE DAY as Americans for 248 Years. People in the United States commemorate the adoption of the **Declaration of Independence on July 4, 1776.** The Declaration states that the 13 American Colonies are free and independent of Great Britain.

Americans Celebrate our nation's founding each year on the 4th of July and we should take time to reflect on the principles of liberty and self-governance enshrined in the Declaration. Remember to show how glad we are!

Computer Concepts will be CLOSED on July 4, Independence Day, to share the day with our friends and family.

When school is out, students have more free time to engage in leisure time activities and summer learning programs. They will surely spend time with friends and family, take vacations, join various summer programs, or just have fun with their friends.

STAY SAFE AND HAVE FUN THIS SUMMER!

Parents' Day, SUNDAY, JULY 27th

Parental figures in the United States receive recognition for the role they play in their children's lives on Parents' Day. The day aims to promote responsible parenting and to recognize positive parental role models. It celebrates the special bonds of love between parental figures and their children.

ATTENTION BUSINESS OWNERS!

COMPUTER CONCEPTS MANAGED SERVICES PROVIDER PROGRAM WILL BE AVAILABLE VERY SOON

Every business or organization prioritizes the effectiveness of its operations. However, not every business has the resources to maintain its functionality. Many small businesses typically fall behind a larger company with newer equipment and technology.

A Managed Service Provider will help your company stay in the race to keep up with the bigger companies. The Managed Service Provider (MSP) is an outsourced company contracted to remotely manage or deliver IT services such as networks, application infrastructure, or security management to a client company or organization. By assuming full responsibility for those services, an MSP determines proactively what technologies and services are needed to fulfill the client's operational and security needs including periodic security compliance certifications.

Besides offering cyber solutions to detect vulnerabilities and threats, an MSP also provides the resources to stop threats before they become detrimental to the organization. An MSP also provides proactive cloud hosting, virtualization, and backups.

Computer Concepts will provide a full MSP or tailored MSP services to assist with your Apple and Cyber Security needs.

Computer Concepts Managed Services Program will include the following four apps: Addigy, SECURITY COMPLIANCE, BackBlaze, and Watchman Monitoring

ADDIGY

Businesses are becoming more dependent on technology requirements that ensure their critical automation network is current and fully functional.

For businesses utilizing an Apple-based network, managing iOS and macOS devices can be a daunting task.

Apple continues to make periodic updates to each of its Operating Systems. Addigy can remotely schedule and deploy these system updates to your macOS, iOS, iPadOS, and tvOS devices keeping them up-to-date and fully functional.

Addigy remotely monitors your Apple products for security problems, device performance issues, and anything that might reduce end users' productivity.

As the use of Apple Devices becomes more common in homes and workplaces the risk of cyber threats continues to rise. Addigy can keep your data and devices safe.

As an Addigy partner, Computer Concepts can remotely manage security services for your network to help improve your digital operations.

SECURITY COMPLIANCE

THE FTC SAFEGUARDS RULE IS DESIGNED TO ENSURE THAT COVERED ENTITIES MAINTAIN SAFEGUARDS TO PROTECT THE SECURITY OF SENSITIVE CUSTOMER INFORMATION.

Any company that receives, maintains, processes, or has access to a client's customer information is required to have "appropriate safeguards" in place to protect them. Covered entities are directed to ask service providers about their information security program, annual risk assessments, and associated data security safeguards in place.

Documenting these answers and whether these safeguards are subjected to testing and continuous systems monitoring is required.

All Companies Must Be Compliant By 2025! This Service can be provided by Computer Concepts

BACKBLAZE

World's Easiest Cloud Backup

Backup Your MAC or PC

Get Peace of Mind when your files are backed up securely to a Cloud Backup.

Unlimited Storage/Computer Subscription

Provides Access Anywhere

Access Files anywhere through the Web, IOS, or Android. Wherever you are, your Files will always be with you.

WATCHMAN MONITORING

Peace of Mind is what every computer owner wishes for. Watchman monitors the overall health of your computer including the system, its hard drive, backups, malware, and other components.

Watchman does not allow access to your personal data.

Computer Concepts will be offering the WATCHMAN service in our Managed Services Program.
