Williamsburg - Yorktown

Father's Day is the holiday honoring Fathers and Fatherhood, an inclusive role that extends beyond biological ties. It encompasses men who nurture and guide children. Father's Day, Sunday, June 15th.

JUNETEENTH, short for "**June Nineteenth**." The holiday commemorates the emancipation of enslaved people in Texas and the United States. **Celebrated on June 19th each year.**

On the 4th of July, Americans will have celebrated American INDEPENDENCE DAY as Americans for 248 Years. People in the United States commemorate the adoption of the **Declaration of Independence** on **July 4, 1776**. The Declaration states that the 13 American Colonies are free and independent of Great Britain.

Americans Celebrate our nation's founding each year on the 4th of July and we should take time to reflect on the principles of liberty and self-governance enshrined in the Declaration. Remember to show how glad we are!

Computer Concepts will be CLOSED on July 4, Independence Day, to share the day with friends and family.

Summer Solstice 2025 will fall on Friday, June 20 The Summer Solstice is associated with themes of renewal, fertility, and abundance. It represents the peak of the Sun's power and energy, resulting in the Sun appearing at its highest point in the sky.

Thousands of Students Graduate in May and June. Colleges and universities in the United States typically conduct their graduation ceremonies from mid-May to early June.

Most high schools in the United States graduate their students in May or June. This is typically the time when the school year ends and the academic calendar concludes. For example, [WJCC Schools](#) in Williamsburg, VA, will be recognizing the Class of 2025 on June 7, 2025.

When school is out, students have more free time to engage in leisure time activities and summer learning programs. They will surely spend time with friends and family, take vacations, join various summer programs, or just have fun with their friends.

Happy Spring!

We've had a lot of rain, but we're finally having more warm sunny days and blooming flowers. In celebration of Spring, Computer Concepts stores are bringing back our popular Spring tech Cleaning Promotion from last year at the same price of \$89.99.

ATTENTION BUSINESS OWNERS!

**FIND OUT MORE ABOUT COMPUTER CONCEPT'S
MANAGED SERVICES PROVIDER PROGRAM**

Every business or organization prioritizes the effectiveness of its operations. However, not every business has the resources to maintain its functionality. Many small businesses typically fall behind a larger company with newer equipment and technology.

A Managed Service Provider will help your company stay in the race to keep up with the bigger companies. The Managed Service Provider (MSP) is an outsourced company contracted to remotely manage or deliver IT services such as networks, application infrastructure, or security management to a client company or organization. By assuming full responsibility for those services, an MSP determines proactively what technologies and services are needed to fulfill the client's operational and security needs including periodic security compliance certifications.

Besides offering cyber solutions to detect vulnerabilities and threats, an MSP also provides the resources to stop threats before they become detrimental to the organization. An MSP also provides proactive cloud hosting, virtualization, and backups.

Computer Concepts will provide a full MSP or tailored MSP services to assist with your Apple and Cyber Security needs.

Computer Concepts Managed Services Program will include the following four apps: Addigy, SECURITY COMPLIANCE, BackBlaze, and Watchman Monitoring

ADDIGY

Businesses are becoming more dependent on technology requirements that ensure their critical automation network is current and fully functional. For businesses utilizing an Apple-based network, managing iOS and macOS devices can be a daunting task.

Apple continues to make periodic updates to each of its Operating Systems. Addigy can remotely schedule and deploy these system updates to your macOS, iOS, iPadOS, and tvOS devices keeping them up-to-date and fully functional.

Addigy remotely monitors your Apple products for security problems, device performance issues, and anything that might reduce end users' productivity. As the use of Apple Devices becomes more common in homes and workplaces the risk of cyber threats continues to rise. Addigy can keep your data and devices safe.

As an Addigy partner, Computer Concepts can remotely manage security services for your network to help improve your digital operations.

SECURITY COMPLIANCE

THE FTC SAFEGUARDS RULE IS DESIGNED TO ENSURE THAT COVERED ENTITIES MAINTAIN SAFEGUARDS TO PROTECT THE SECURITY OF SENSITIVE CUSTOMER INFORMATION.

Any company that receives, maintains, processes, or has access to a client's customer information is required to have "appropriate safeguards" in place to protect them. Covered entities are directed to ask service providers about their information security program, annual risk assessments, and associated data security safeguards in place.

Documenting these answers and whether these safeguards are subjected to testing and continuous systems monitoring is required.

All Companies Must Be Compliant By 2025! This Service can be provided by Computer Concepts

Backblaze

World's Easiest Cloud Backup Backup Your MAC or PC

Get Peace of Mind when your files are backed up securely to a Cloud Backup.

Unlimited Storage/Computer Subscription

Provides Access Anywhere

Access Files anywhere through the Web, IOS, or Android. Wherever you are, your Files will always be with you.

Peace of Mind is what every computer owner wishes for. Watchman monitors the overall health of your computer including the system, its hard drive, backups, malware, and other components. Watchman does not allow access to your personal data. Computer Concepts will be offering the WATCHMAN service in our Managed Services Program.
